Jax Dental Lab

Quality Dental Services You Can Trust and Afford

945 Lane Avenue, Jacksonville, FL 32205

904-786-9200 • Fax 904-786-1116

Our vision is to grow our company by exceeding the expectations of our customers and to reinvest in the business to provide the best product at affordable prices.

Our mission is to provide quality custom products at affordable prices under a customer satisfaction guarantee policy.

The combination of the latest material and technology and the clinical and technical experience of our technicians allows us to provide you with a final product made just the way you requested.

All-Ceramic Digital System[®]

With our comprehensive All-Ceramic Digital System and 3-D printing and milling our lab will deliver a custom restoration each time. We create your crowns, veneers, bridges and even onlays and inlays with digital precision using advanced new technology and the dental expertise of you technicians. We use the most advanced CAD/CAM system by Sirona Inlab™ to create our restorations to the exact prescription of the dentist and special requests of the patients.

We proudly offer products using...

We can fabricate any ceramic restoration from single crown to full zirconia bridge only using the best materials.

Screw Retained

Bruxzir

Zirconia Bridge

We can also fabricate custom Zirconia, Porcelain or Titanium abutment.

Porcelain Abutment

Titanium Abutment

Ivoclar IvoBase[®] Injection System

You can count on consistent results every time when you choose dentures using the IvoBase Injection System from Jax Dental Lab. The SR IvoBase System produces highly accurate methyl methacrylate-based dentures. After mixing, the material is injected into the flask under pressure. Constant pressure is

applied during polymerization. As the denture base material flows consistently, the shrinkage of the material is optimally compensated. The results is a denture with precise fit, excellent finish and glossy basal surfaces.

TCS FlexiblePartial

TCS[®] Unbreakable has a lifetime guaranteed against breakage. Extensive testing and clinical history has validated that TCS[®] Unbreakable will not break under proper use of the restoration.

TCS[®] Unbreakable Benefits:

- Nylon Based Thermoplastic
- Guaranteed Unbreakable
- Clinically Unbreakable
- Lightweight
- Durable yet Flexible
- Can Repair and Reline
- Stain Resistant
- Stain Free
- Very Low Water Absorption
- Available in 4 Translucent Shades

Flexible partials create natural looking and comfortable partial dentures so that you can look and feel your best.
